Arthur Hardman Borges

PROFILE SUMMARY

I am a Full-stack developer with expertise in designing and integrating service channels within the telecommunications and digital sectors. My work focuses on building scalable middleware, implementing API-driven integrations, and structuring robust database solutions. I have strong experience in workflow automation for customer interaction platforms, as well as applying MVC principles to ensure maintainable and efficient architectures. Alongside backend and infrastructure, I contribute to deployment pipelines, containerization, and system reliability, while keeping a working knowledge of frontend concepts to support end-to-end solutions.

I am a strong advocate of team collaboration and knowledge sharing, I actively contribute to team growth through training sessions and cross-department engagement. With strong analytical skills and critical sense, I excel at solving complex technical challenges, prioritizing tasks, and delivering high-performance solutions from requirement gathering to implementation, support, and maintenance.

I am seeking an opportunity to work on large-scale international projects that will challenge my skills and allow for both professional and personal growth.

WORK EXPERIENCE

Nov 2024	System Specialist
Present	Rede D’or São Luiz, São Paulo - SP
	Manage and optimize the NICE CxOne omnichannel platform, specializing in IVR development, REST API integrations, and cognitive BOT implementations for digital channels. Serve as the primary liaison between business stakeholders and external partners, translating requirements into technical solutions and guiding developers through documentation and implementation. Design POCs and MVPs, provide end-to-end support for internal customers, and lead workshops and training sessions to drive platform adoption. Maintain technical documentation (system topologies, timelines) and deliver on-site support at call centers to enhance user experience and system performance.
Jan 2023	Senior Full-Stack Developer
Nov 2024	A5 Solutions, São Paulo - SP
	Lead end-to-end technical projects, specializing in integrators, connectors, IVR service channels, and digital platforms. Design and implement analytical portals to monitor application performance, automate processes, and optimize system functionality. Oversee team responsibilities, collaborate with cross-functional teams, and ensure high-quality, scalable solutions that align with business needs. Provide technical guidance and mentorship to colleagues developers, fostering innovation and continuous improvement.
Jan 2020	Mid-Level Software Developer
Jan 2023	A5 Solutions, São Paulo - SP
	Developed and maintained IVRs using Java (AVAYA IVR) and Snippet (NICE IVR), integrating databases, consulting external APIs, and building middleware for Tomcat servers and AWS environments. Designed and optimized databases, automated data extraction and transformation processes, and enhanced system performance. Worked closely with cross-functional teams to deliver scalable solutions aligned with business objectives.
Sep 2014	Technical Support Engineer
Dec 2019	A5 Solutions / Avaya, São Paulo - SP
	Specialized in advanced troubleshooting for the Avaya platform, including Predictive Dialers and IVR application servers. Acted as the Single Point of Contact (SPOC) for real-time bridge conferences between customers and specialists, resolving complex technical issues in English and Portuguese. Developed and led Technical Knowledge Transfer (TKT) sessions, coaching team members to enhance technical expertise and maintain high service quality.

EDUCATION AND QUALIFICATIONS

Jul 2016	Technologist in Systems Analysis and Development
Jul 2019	Centro Universitário Senac, São Paulo - SP
	Higher Education in Systems Analysis and Development.
Jan 2009	English as a Second Language
Dec 2013	Entry / Cultura Inglesa, Diadema - SP
	Complete training, with all modules of the 'Entry' institution. A partition of 'Cultura Inglesa' focused on Business area.

LANGUAGE

Portuguese (BRA) : Mother Language
English : Proficiency

TELECOM TRAINING

- NICE inContact Core Certification
- Avaya Aura Communication Manager Administration
- Avaya Aura Experience Portal and Proactive Outreach Manager
- Avaya Orchestration Designer for Self Service - Fundamentals
- Avaya Proactive Contact Basic and Advanced System Supervisor
- Implementing and Supporting Avaya Aura Experience Portal and POM

SKILLS

- Backend:** Java, Spring Boot, Spring Data JPA, JWT, Maven, REST/SOAP.
- Frontend:** React, TypeScript, JavaScript, CSS, Thymeleaf, Bulma, Bootstrap.
- Databases:** MySQL, PostgreSQL, Microsoft SQL Server.
- Cloud & DevOps:** Docker, CI/CD (Git, Jenkins).
- Networking & Infrastructure:** Linux, Windows Server,

INTERESTS

- Interested in pursuing a postgraduate degree or MBA to deepen my expertise.
- I'm looking to work on international projects ;
- Passionate about music and play different instruments, fostering creativity outside of work.
